

MINI PROJECT

Topic: Ayur Solution System

Presented by

Anusree Rajeev

Rollno 10

S3 LE MCA

ABSTRACT

The system helps the user by providing easy to purchase ayurvedic medicines, consulted to the doctor by online booking. User can also search better treatment for their disease and they can be search popular ayurvedic hospitals depending on the name of disease.

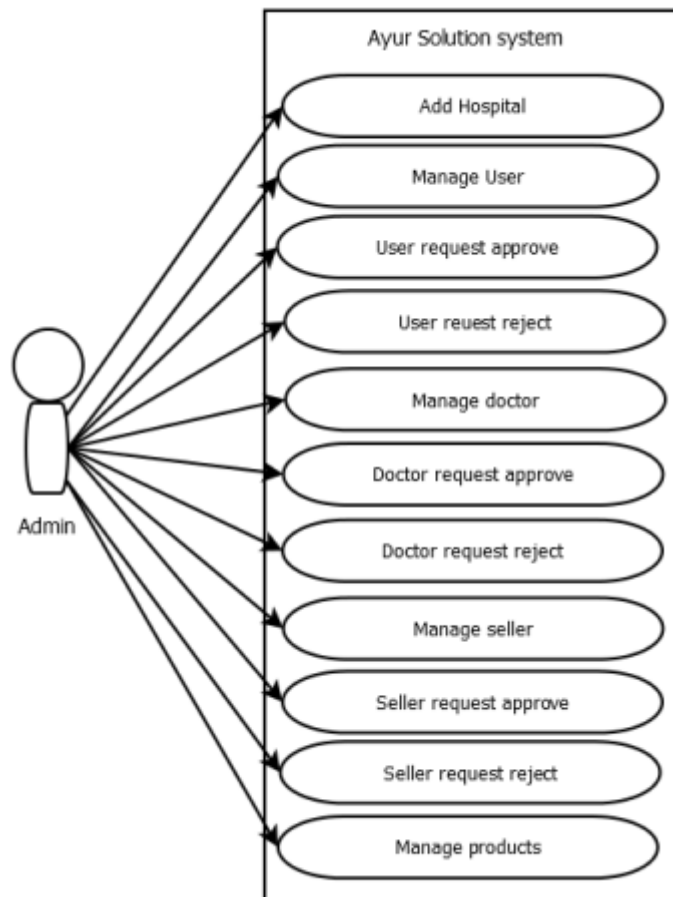

There are five modules in this system. Admin, User, Seller, Doctor, Hospitals.

The user can search hospitals, doctors and book the consulting date and purchase ayurvedic materials for their own purposes. The seller can purchase ayurvedic materials for their own company or their own purposes. The doctor can view the patients list and consulting details and they can suggest medicines and replay for users doubts. Hospitals can add available doctors view the bookings from the users and set the consulting time and date. Admin can manage the whole system and can be add the hospitals.

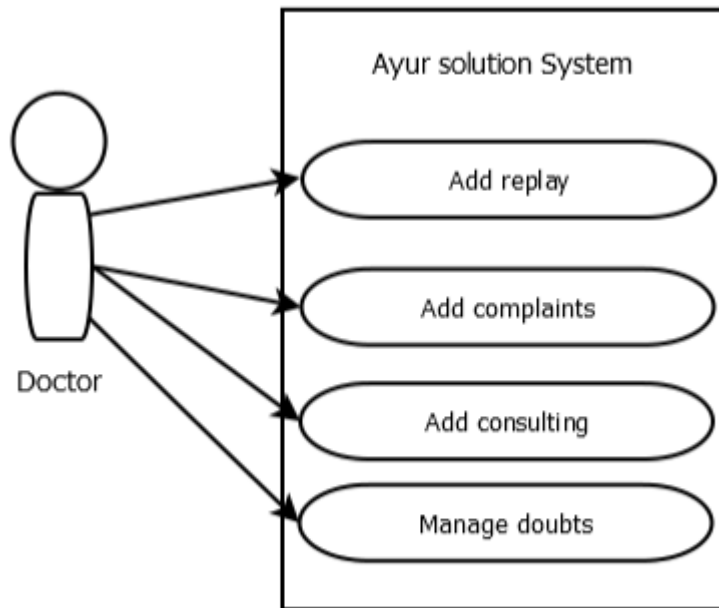

The API is used by locating the nearest hospitals using google API.
